

ASTRONAUT LUNCH BREAK

A combination of a short tour, luxury bread roll lunch and networking in space

WHAT

A programme combining a short tour with luxury bread roll lunch and networking in a space environment. A light intermezzo between a morning programme and the afternoon activities. Group: 20-120 p. Duration: 2,0-2,5 hours.

FOR

Business clubs, organisations, company day groups, and conference groups that are looking for a relatively short and light visit to ESA ESTEC.

PROGRAMME

The programme has educational elements (presentation, tour zero-g, space lab, Mars Lab, ExoMars rover) and time for networking. By combining these two elements in a structured or flexible way, we can fine tune the programme to accommodate both small and large groups to get the balance you want.
