

UNIVERSITY TOUR

A tour for university (STEM) students from the 22 ESA members states

WHAT

A tour of ESA ESTEC which can be a more general introduction to the space agency or the visit can be complemented with a laboratory or facility. All depends on type of students, the request and the availability.

FOR

University students from ESA member state countries with a background in STEM since these are the future scientists and engineers of ESA.

PROGRAMME

ESA overview presentation, 360 panoramic tour of the satellite test facilities, tour of the exhibition area about zero-g research, space station, Columbus space lab, Mars Lab, ExoMars rover, research into 3D printing for space, ESA's space plane. Possibly with a visit to additional labs or facilities depending various factors.
